Education

University of New South Wales (UNSW)

2021–2025

Bachelor of Science (Computer Science)

North Sydney Boys High School

2015–2020

Technical Skills

Languages: JavaScript, TypeScript, C, C++, Java, Python, PHP, SQL, HTML, CSS, SCSS

Frameworks/Libraries: React, React Native, Node.js, AWS, Bootstrap, Tailwind

Tools: Git, Bitbucket, Supabase, Terraform, WordPress, Figma, Vercel, FileZilla

Professional Experience

1000Heads - Social Transformation & Brand Promotion Company

Tech Intern

Jan 2025 - Jun 2025

- Engineered a modular WordPress Gutenberg component system using PHP, JavaScript and SCSS to create reusable and customisable website components, enabling clients to manage and update content independently without developer intervention.
- Developed interactive React based product demo interfaces for ISUZU at the 2025 BTS, implementing touch driven UI interactions, video playback and custom CSS styling to deliver a brand aligned experience on tablet devices.
- Built and synchronized an LED Light Show to showcase ISUZU's new truck range at the 2025 BTS using ESP32 WLED controllers with Wi-Fi connectivity, enabling real-time LED customization via a browser interface
- Coded responsive HTML emails for Energy Australia distributed as monthly newsletters for thousands of subscribers.

Ainsworth Game Technology - Gaming Technology Company

Test Engineer, Technical Compliance

Mar 2026 - Sept 2026

- Tested electronic gaming machine (EGM) software across physical machines, desktop emulators and online environments using proprietary tools, Unity and WinEngine against Australian & New Zealand Gaming Machine Standards
- Used Beyond Compare to analyse differences between game versions by comparing code, configuration, assets and artworks to identify changes, assess their purpose and investigate potential regressions.
- Configured and tested physical EGM hardware, including processor boards, machine peripherals and PC interfaces, developing practical experience with hardware/software integration and system configuration.
- Developed practical Excel skills for validating and cross-referencing game data, including using VLOOKUP and structured comparisons to efficiently identify discrepancies across datasets

Extracurricular Experience

Data Science Society (UNSW)

Marketing Subcommittee Member

Mar 2024 - Nov 2024

- Created and published promotional content across Instagram, Facebook and TikTok, including Canva designed graphics and short form video, adapting content to different platforms and audiences to increase event visibility.

Tutor

Coding & Robotics Tutor, HSC, Selective & OC Private Tutor

Jan 2018 - Now

- Introduced students to foundational programming concepts and basic robotic buildings through Scratch and WeDo
- Delivered personalised tutoring and resources to students of diverse learning needs from K-Yr12

Projects

Similarity Calculator — similitude.vercel.app

- Developed and deployed a full stack social discovery website using React and Bootstrap, implementing a custom weighted similarity algorithm across 25+ personality traits, MBTI dimensions and lifestyle/philosophical attributes.
- Implemented user authentication and profile management using Supabase Auth and PostgreSQL, designing a normalised schema with JSONB columns to store structured, extensible questionnaire data while enforcing data access rules via Row Level Security policies.

Tutoring Website - Prime Tuition — primetuition.org

- Designed, developed and deployed a practical multipage website for Prime Tuition using React and CSS, prioritising simplicity, usability and practicality.
- Implemented a lightweight contact form backend using Google Sheets, providing a simple but maintainable way to manage enquiries without a dedicated backend.

Platform for Melody Mentoring

- Developed a full-stack platform for music learners with AWS Cognito, S3 and DynamoDB, enabling real time audio/video recording and AI-based feedback while ensuring scalability, security and reliability at scale.
- Built a React Native mobile frontend with responsive UI, secure authentication and real time file uploads, providing students and teachers with a seamless crossplatform experience.
